Value Addition to your Team

Scalable model we offer

OUR DIFFERENTIATES HIRE A DEVELOPER AND GET A TEAM

OUR TEAM IS THE CREAM OF IT INDUSTRY

Only experienced resource

Certified through external agencies in the competencies. They work in (A certification is an indicator that the developer has global benchmark knowledge of the technology they work in)

Project base model (Services)

A lot of entrepreneurs who got great business ideas need help with development cost, some are lucky to have IT experts as part of their core team but a majority of them needs help to get a budget

Even someone who has spend years in information technology some time has challenges to estimate in today world as solution requires a spectrum of technology and one person mastering all is rare .

We used function point technique along with our decades of experience and validation of estimations by different teams without our organization .

This tool we came up with has gone over several evolution and have matured into what we see today .

We have automated it, made it as intuitive as possible for any one to get estimate and this is completely free of cost . Our way of giving back to the industry on what we have learnt and how it can save a lot of effort and judgement

We have covered many industries , complexities , functional features , non functional features and most important it has consideration for technology productivity as well .

WATER **SCRUM** FALL MODEL

Project Manager

How we work

DEVELOPMENT & TESTING PHASE

An independent tests after coding is done in **Sprint of 2-3 Weeks** (agile model)

Catch bugs in early phase to reduce

Helps avoid costly
redevelopment in later phase

major drawback of
Waterfall model

**Milestones in the development and testing phase
depends of the complexity of the project.**

DOCUMENTATION & CODING STANDARDS

We ensure:

Precise documentation (don't worry, we won't over do)

Optimal performance by following specific coding standards of each competency

Communication

All our team members are food in English communication

Developer's communication skills, if worrisome will be taken care of by the PM

We communicate through emails, Microsoft Teams, Google Meet, Skype, WhatsApp, Viber etc

We have immediate reply policy and are always just a call away

App Maintenance Engagement Models

Annual Maintenance Contract

Involves support of application, technical, functional and ongoing increments on cloud as well as on mobile.

Part-Time/ Full- Time Contract

Dedicated support staff for all maintenance work which includes app monitory, enhancements and upgrades.

Scope based Maintenance

According to the scope provided by client, Redbytes deliver support as per the maintenance agreement on a fixed or hourly cost.

Annual Maintenance Contract (AMC)

Do you want to avoid having to hurry for resources and review quotes when your app is failing? Then, Redbytes AMC is ideal for you. Invest in the package that best suits your requirement and enjoy multiple benefits

Benefits of Annual Maintenance Contract

- > Get immediate/emergency services when you really need it
- > Longer life of your hardware, software, and other facilities
- > Easy Budgeting & money-saving stages throughout
- > Continuous updates or upgrades at any time
- > Preventative maintenance without any breakdowns
- > Monitor Maximum productivity and app performance
- > Lesser Downtime and effective scheduling
- > Envisage dedicated service schedules
- > No tensions about hourly charges
- > Enjoy the benefits of comprehensive services
- > One-time Payment - Deposit an amount once in a year
- > Engage with devoted and skilled technicians
- > Better Concentration on your business operations
- > Reliable services without coverage Lapses
